Art Unit 2632

1. The following is an examiner's statement of reasons for allowance:

Among the new art cited by applicant, it is noted that the "Flexiscan Product Range" publication (by id Systems) teaches a hand-held RFID reader (Fig. 1) having a display, antenna (Fig. 2), and "computer"-type element (the publication appears to use the terms "hand-held reader" and "hand-held computer" interchangeably, see page 7, next-to-last paragraph and page 8, first paragraph below Table 1); however, this publication fails to teach or suggest "reading information from multiple RFID tags substantially simultaneously", i.e. the reader in this publication only reads one tag at a time. US Patent 5,850,187 (Carrender et al) discloses a "portable electronic tag reader" 50, having a self-contained housing (Fig. 4), display 308 (Fig. 3), and antenna 206; however, this patent fails to teach combining the "host computer" 232 with the reader 50 to make an "integrated unit" therefrom, and also fails to teach "reading information from multiple RFID tags substantially simultaneously".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tom Mullen whose telephone number is (703) 305-4382.
